New Management Acquires JJM Boiler Works, Inc.

Westfield, Massachusetts – April 14, 2020 – JJM Boiler Works, Inc. (“JJM” or the “Company”) has been acquired by an affiliate of Kyle Emmons, the new President and Owner of JJM.

George Carney, founder of JJM, stated, “My wife, Denise, and I have spent the last 15 years building JJM into a leading supplier of neutralization products. Although we have enjoyed the ride, it’s now time for us to slow down and enjoy more time with family and friends. JJM has never been stronger and the Company is well-positioned to be a leader in our industry. We expect Kyle will be a great steward of the Company and we are excited about the new possibilities that he brings to the table.”

JJM will maintain its headquarters and operations in Westfield. The Company will continue to design and manufacture innovative, purpose-built neutralization solutions for the HVAC and plumbing industries. The transaction closed in November 2019.

Kyle Emmons, President and Owner of JJM, stated, “George and Denise, along with the JJM team, have worked hard over the years to build JJM into the great business that it is today. I am thrilled and honored to be leading the Company into its next chapter. We greatly appreciate the support of both our long-standing and new customers, and we look forward to JJM continuing to serve your needs in the years to come.”

About JJM – Founded in 2005, JJM is a leading designer and manufacturer of pH neutralization solutions used in residential and light commercial installations. The Company’s purpose-built products ensure heating apparatuses can safely operate, protecting facilities and the environment. JJM’s products are sold to leading Original Equipment Manufacturers, dealers, and regional wholesalers of HVAC equipment throughout the United States and Canada.

JJM is Your Green Solution for Neutralization
